Joanna Martindale

Profile: I am a determined and focused gap year student interested in the technology sector. I have strong analytical and critical thinking skills and enjoy bringing a creative approach to technical challenges.

EDUCATION

St Mark's Church of England Academy Mitcham, UK A-Levels: Computer Science A, Mathematics A, Physics B Sept 2024 - June 2026 **GCSES:**
10 GCSEs: Grades 9-7 (equiv. A*- A), including Grade 9s (A*) in Maths, Physics and Computer Science *Top 5 performers in cohort.*

WORK EXPERIENCE

CBRE Global Workplace Solutions Fulham, UK *Work Experience* August 2025 • Shadowed 4 employees working within the project and hard facilities management industries, gaining insight into HVAC and Building Management Systems, and the use of a well-defined scope and cost plans to manage overspending on a complex hospital project.

- Assisted with on-site hazard assessment (independently identifying 6 risks).
- Completed a practice method statement and risk assessment review, showing me how effective risk assessment protects against scope creep (e.g. identifying asbestos in the walls helped account for additional costs and establish an effective method of work).

STEMETTES x Quadrature STEAM Goals 25 London, UK *Insight Day* July 2025 • Led a team of 4 to design 'PausePal' (a portable public safety device and digital service for menopausal women) over 3 hours and pitch it to a judging panel of 5 including 3 Quadrature employees.

- Developed skills in TinkerCAD and Canva to create a prototype and presentation, outlining our mission, the product's key features and its scalability.
- Divided tasks between members according to their expertise (creative design, growth strategy, and technical aspects) and supported younger members to shape their ideas into a practical proposal.

Viasat Space for Good Competition London, UK *Competition* Dec 2024 - July 2025 • Developed my knowledge of sustainability challenges in space.

- Proposed a satellite design which mitigated the effect of space debris by improving component durability and using computer vision to aid onboard self-maintenance.
- Created a video presentation using Canva, thinking beyond technical design and factoring policy and environmental impacts to refine my idea into a sustainable solution.

LEADERSHIP London, UK Member of the Black Is Great
Group Member Sept 2024 – March 2025 • Worked in a team of 18 to organise a cultural celebration event for over 200 people in 2 weeks. • Oversaw the progress of each element of the event (creation of event resources and finding entertainment). • Assisted with advertising, going 'door-to-door' to different year groups, helped with the venue set-up, and ticketing control whilst working with a limited budget (approx. £200) and resources.

SKILLS, ACTIVITIES & INTERESTS

Technical Skills: Python (Intermediate), HTML, SQL, TinkerCAD (Elementary), Canva, French

(Elementary) **Soft Skills:** Communication, Creativity, Resilience, Organisation, Teamwork, Leadership

Activities & Interests: Piano, Gymnastics, Drama Performance, Musical Theatre
